SYNOPSIS

Merging the creativity of production with the structure of web development to create thoughtful, useful applications.

TECHNICAL SKILLS

Front-End Development
- AJAX, AJAJ, APIs
- CSS3
- HTML5
- REST

Interpreted Languages
- JavaScript
- Python
- Ruby

Programming
- Object-oriented
- MVC

Databases
- NoSQL (MongoDB)
- SQL (MySQL, SQLite, PostgreSQL)

Servers
- Node.js
- AWS, NGINX

Version Control
- Git

Libraries
- AngularJS
- CSS3
- Django
- Express
- Flask
- jQuery
- Rails

MULTIMEDIA SKILLS

- Adobe Creative Cloud, especially Audition, Photoshop, Premiere
- Logic Pro
- GarageBand
- Microsoft Office Suite, iWork
- Audacity
- Proficient with DSLR cameras (especially Canon EOS family), mixing boards, A/V equipment
- Experienced in web/broadcast producing, audio production

EDUCATION

University of Maryland, Philip Merrill College of Journalism, College Park, MD
Major in broadcast journalism, minor in environmental economics and policy. GPA: 3.77. B.A. cum laude May 2010.

Coding Dojo, McLean, VA
Full stack software development bootcamp, intensive on-site training for 14 weeks. Achieved highest honors in front end web development, Ruby stack, Python stack, and MEAN stack.

PROJECTS

ChatBot | *Full MEAN, Sockets.io* | Utilized sockets to create an app with the ability to have a conversation with a user and follow user prompts.

TwitterBot | *Ruby, Twitter API* | Created a bot to follow hashtags and reply to users with related @ responses.

WishList | *Python, Django, Materialize* | Wrote an application in which a user must login (validations included with RegEx), and can add items to a wishlist.

BucketList | *Full MEAN, Materialize* | Wrote an application in which a user can create goals with friends.
